The Architecture Lifecycle

CONCEPTUALIZATION

- Stakeholder Requirements
- Business & Technical Needs
- Compliance Identification
- Initial Threat Modeling
- Risk Analysis
- Security Foundations

DESIGN

- Architecture Blueprints
- Data Flows & Interfaces
- Security by Design
- Control Definition
- Compliance Integration
- Pipeline Security Gates

DEVELOPMENT

- Code & Configuration
- Secure Implementation
- CI/CD Integration
- Automated Security Testing
- Continuous Validation
- Architect Oversight

TESTING (Continuous & Integrated)

- Unit / Integration Testing
- SAST / DAST / SCA
- Regression Testing
- Penetration Testing
- Compliance Validation

DEPLOYMENT

- Staging & Validation
- Secure Configuration
- Canary / Blue-Green Release
- Monitoring Activation
- Rollback Mechanisms

MAINTENANCE

- Continuous Monitoring
- Incident Response
- Patch & Vulnerability Mgmt
- Performance Optimization
- Compliance Revalidation
- System Enhancements

FEEDBACK LOOP

- Lessons Learned
- New Requirements
- Threat Updates
